

Haldon Forest Park QR Codes

You can now record your journey around the Permanent Orienteering Courses at Haldon by scanning the QR codes on each orienteering post.

To do this, you will firstly need to download the free Maprun App onto your phone.

- In your App store search for **'Maprun'**

- Get the App and register.
- Tap **'Events Near Me'** or **'Select Event'** > **'UK'** > **'Devon'**
 - Select **'Haldon Forest QR'**
 - Select the course you want to try.
 - Tap **'Go to Start'**
- Scan the QR code on the Start post and at each post as you go around.
 - When you finish you will get a result with your time.

Tip: If you are not confident in navigating using a map you can use the **'Display Current Location'** option on the app which will show you where you are on your way around. To enable this tap **'Options and Settings'** on the home page of the app, scroll down to **'Event Display Options'** and tap **'Display Present Location'**. As you navigate around your course a red dot on your phone screen will show you where you are on the map at all times.

The map for each course is displayed on your phone but an A4 size paper map is easier to use when navigating. Paper maps can be downloaded and then printed for free by visiting <https://www.goorienteering.org.uk/>.

The maps are also available from the rangers office for a small fee.
